-OUTPUTS-

Voltage/Current (V/A).....	V1	V2	V3	V4
Model: PCI254-1022-4 ...	5.0/33	3.3/33	+12/6.0	-12/1.0
PCI254-1022-4-P	5.0/33	3.3/33	+12/6.0	-12/1.0

Total loading on all outputs not to exceed 250W.
Maximum combined load of V1+V2 not to exceed 55.0A

Model: DPCI254-1022-4	5.0/33	3.3/33	+12/6.0	-12/1.0
DPCI254-1022-4-P	5.0/33	3.3/33	+12/6.0	-12/1.0

Total loading on all outputs not to exceed 250W.
Maximum combined load of V1+V2 not to exceed 55.0A.

Minimum Loading 5% minimum on V1 for standard models; none required for option "P" models.

Line Regulation At the Sense Point, Over Full Input Range $\leq \pm 1\%$, sense leads connected.

Load Regulation Output voltage droops with increasing load.

Stability Output drift $\leq \pm 0.2\%$ after 20 minute warm-up.

Temp. Coefficient $\leq \pm 0.02\%/^{\circ}\text{C}$, 0° - 50°C, after 20 minute warm-up.

Dynamic Response Less than 3% deviation with a 25% load change at 1A/ μsec . Output returns to within 1% in less than 300 μsec .

Ripple and Noise (PARD) For all outputs, 50mV max or 1% peak-to-peak nominal, which ever is greater, DC to 20MHz bandwidth with a coaxial probe and 0.1 μF /22 μF capacitors at the output terminals.

Current Sharing/ Parallel N+1 Operation... V1, V2, V3 Outputs. Single wire connection for $\pm 10\%$ current sharing between any number of units. Mixing standard and opt. "P" models is not recommended.

Remote Sense V1, V2, V3 outputs compensate for up to 0.25V total line drop in the load cables. Outputs are internally sensed if leads are opened.

Hold-Up Time Outputs remain in regulation >15msec minimum following loss of AC power at low line, full load.

Over Current/Short Circuit Protection Current limit on all outputs. Automatic recovery when overload is removed.

Over Temperature Protection Internal temperature sensing. Causes all outputs to shut down. Automatic recovery.

Over Voltage Protection Non-crowbar type. Any output that exceeds 25% $\pm 10\%$ of nominal Vout will cause all outputs to latch off. Remote inhibit, enable or input recycle required to reset.

Over/Under Shoot None at turn-on or turn-off.

Under Voltage Warning.. Any output dropping below 10% of nominal triggers the power fail warning signal.

-SIGNALS, INDICATORS and CONTROLS-

Remote Enable Enabled by closed circuit or TTL logic 0.
Disabled by open circuit or TTL logic 1.

Remote Inhibit Enabled by open circuit or TTL logic 1.
Disabled by closed circuit or TTL logic 0.

Power Fail Warning Loss of input AC causes a TTL compatible signal to go low >4msec prior to V1 or V2 output dropping out of regulation. At AC turn-on, signal stays low until outputs are in regulation. AC and DC input: PF signal triggered by an under voltage condition on V1 or V2 outputs.

LED Indicator Dual LEDs. Green indicates input power ON and outputs within regulation. Off or Amber indicates input and/or output power fault.

-OPERATING ENVIRONMENT-

Operating Temperature.. 0° - 50°C ambient at full load, with specified airflow.

Cooling A minimum of 20 cfm / 600 lfm direct forward airflow required to achieve full rated power and specified MTBF. Consult factory for derating guidelines with reduced or reversed airflow.

Relative Humidity Up to 90% RH, non-condensing.

Operational Vibration 2.0G peak, 5 - 500Hz along three orthogonal axis.

Storage Temperature -40° to 85°C.

Altitude Operating to 10,000 ft; Storage to 30,000 ft.

MTBF Designed for 150,000 hrs at 25°C.

-LIMITED WARRANTY POLICY-

All Jasper Electronics (JE) standard model power supplies and products are guaranteed to be free of defects in workmanship and materials for a minimum of two (2) years from the date of original shipment, when operated within specification. This warranty applies only to defects that result in a failure to perform to published specifications. Non-standard (custom) power supplies and products may be warranted on an individual basis. The unused portion of this warranty is fully transferable with the original equipment in which the power supply is installed.

ORDERING INFORMATION:

A 4 to 6-character option code is required following the base model description to define the desired model configuration. Codes added in the following sequence, 1 from each required category:

*Input: AC – Blank DC – D	Base Model w/ V _{out} Code. 254 – 250W, 4 Output	Connector Type	Internal V1 Preload	Latch Type	Overlay Type	-MXXXX User Specified Config.	RoHS Compliant Model

- * Configuration Options -

- Option: Code:
- (1) Connector Type..... 4 = 47 pin (PICMG standard);
 - (2) Internal Preload... Blank = Standard configuration. Refer to minimum external preload requirements in the general specifications.
P = Optional internal preload on V1.
 - (3) Latch Type S = Standard Telecom Type VII;
O = Optional Type IV;
N = None provided.
 - (4) Overlay S = Standard (JE Logo, model designation, etc);

N = No overlay provided;
NN = No overlay; in addition, the front panel including the EMI strip is also deleted.
For user provided panel or custom enclosure applications. Note: Removal of the panel does not violate safety enclosure requirements or integrity. Contact the factory for panel fastener type, max penetration depth and location information.
M = Custom overlay– user specified. May require a factory assigned custom model code. (- may incur additional cost. Consult factory.)
 - (5) Custom Configuration M = Modified, followed by a factory assigned 4-digit number to identify a user specified configuration. Such models may include special or non-standard features and/or options, or be in a configuration differing sufficiently from the design of the approved similar standard model from which it is derived to require re-evaluation of all or part of the design to insure continuing compliance with all safety requirements. Option codes 2,3,4 may not be present in the model description as these requirements are generally included in the user specification documentation on file with the factory. Consult the factory for exact requirements. (May incur additional cost. Consult the factory.)
 - (6) RoHS Compliant G = Jasper products that are fully compliant with the requirements of Directive 2002/95/EC Restrictions of Hazardous Substances (RoHS) are identified with the letter code “G” either included in or adjacent to the model description on the unit labels and related documents (sales orders, etc). All materials, processes and packaging used in the assembly and shipping of this product comply.
- Note:** non-RoHS compliant standard models only available until existing stock is depleted. User requests for non-RoHS or RoHS-5 (lead exception) versions may be available under the “-M” custom configuration option, at additional cost. Minimum order quantities may apply. Consult the factory.
